

CLEARGUARD PROTECTIVE FABRIC

New transparent PVC screen helps to maintain protected contact during these times of social distancing. Made to measure, Clearguard systems are available as low-cost fixed suspended shade or as a roller shade.

Clearguard provides a barrier between interactions in shops, banks and other commercial buildings, helping to protect against sneezes and viral infections such as Coronavirus.

The PVC screens can be fitted to suspended ceilings and are easy to clear with sterilising spray.

Fabric is flame-retardant.

Available as:

- Fixed suspended shade
- Roller shade with chain control
