## NEW CONTROLS

CBM Network Bridge now supports TDBU Cellaris™ shades. Both top and bottom rails can be controlled independently. System upgrade can be performed on existing installation (requires new OTA firmware for each motor). Please contact customer service for more details. All new orders will ship with this feature pre-programmed and dont require upgrade.

### SCENE CONTROLLER

Allows user to control shades by activating scenes pre-configured & programmed in the connector app. Works without wireless connection.

### 15 CHANNEL TRANSMITTER W/ EDITABLE CHANNELS

New 15 channel transmitter allows user to customize channel names.

### SURFACE MOUNT TRANSMITTER

Surface mount transmitter allows installation on wall surface without a cutout. Can also be used as a portable or handheld device. Available w/ 15 channels or 5 channels w/ timer.
